PROFESSIONAL SUMMARY

Technical implementation professional with 10+ years in enterprise SaaS — specializing in being the bridge between complex technical requirements and client-facing clarity. Experienced leading presales technical demos, scoping integration requirements against real customer data, and translating AI-adjacent platform capabilities into adoption outcomes at enterprise scale. Delivered 212 end-to-end integrations across API, SFTP, and SSO environments with a 91% on-time launch rate and 98% CSAT. Proven ability to define structured data requirements, identify quality gaps in operational datasets, and coordinate cross-functionally with Legal, Finance, and Engineering to keep complex projects on track.

CORE SKILLS

API integrations and troubleshooting · SaaS platform implementation · Issue triage and root cause analysis · Systems thinking and analytical problem solving · Zendesk, Salesforce, Jira · Demo delivery & sandbox configuration · Structured data requirements · Admin training and adoption strategy

PROFESSIONAL EXPERIENCE

Uber Technologies

Growth Implementation Manager | 06/2022 - Present | San Francisco

- Served as technical SME in stage 4/5 enterprise sales cycles — led client-facing demos using sandbox environments configured against real SOW data (approval structures, spend policies, cost centers), translating platform capabilities into client-specific outcomes that accelerated deals to close
 - Built and executed analytical queries to identify adoption gaps across enterprise accounts — surfacing incomplete behavioral data, flagging downstream reporting errors, and producing data-driven recommendations that improved platform utilization and account health visibility across the portfolio
 - Led end-to-end deployment of Uber Health at Kaiser Permanente — identified 40,000 unscoped workers mid-implementation (85,000-user deployment), delivered a multi-org rollout with high adoption and on-time execution, and translated the unscoped gap into a \$2M ARR expansion
 - Served as primary technical liaison between customers and internal teams across all integration phases — from technical kickoff through go-live — ensuring scope, documentation, and project risks were managed throughout
 - Delivered 212 end-to-end SaaS integrations across enterprise segments achieving a 91% on-time launch rate across a portfolio exceeding \$3.4M
 - Scoped and validated B2B API, SFTP, and SSO integrations across Concur, HRIS, and identity platforms for 173,000+ end users — defining required field structures, confirming data format specifications, and running validation checkpoints to ensure incoming data met architectural requirements before every go-live
 - Triageed and resolved integration issues by identifying root causes, coordinating with Engineering and Product, and driving problems to resolution with clear customer communication throughout
-

Cloudbeds

Customer Success Manager | 03/2020 – 08/2022 | Miami

- Converted hotel operators to Cloudbeds Payments by translating platform capabilities into margin outcomes — quantifying the delta between existing processing costs and platform-protected rates rather than selling on features — generating \$2.3M in upsell revenue across a \$1.1M managed portfolio
 - Increased upsell and cross-sell opportunities by 34% through proactive account analysis and performance escalation within 72-hour SLA frameworks
 - Partnered with internal technical teams to scope and resolve platform integration issues for hotel partners, serving as the primary point of contact between client needs and product capabilities
-

Booking.com

Account Manager | 03/2018 – 03/2020 | Miami

- Managed a portfolio of 287 hotel partners driving 63% booking growth against a 40% benchmark — outperforming target by 23 percentage points
 - Reduced partner cancellation rates by 47% through distribution, pricing, and content optimization strategy
 - Conducted data-driven portfolio reviews using Tableau to deliver weekly and year-over-year forecasting and competitive benchmarking
-

Account Executive | 06/2016 – 03/2018 | Atlanta

- Managed full partner acquisition lifecycle from prospecting through marketplace activation consistently meeting onboarding and revenue targets
 - Advised partners on platform functionality, pricing strategy, and digital engagement to increase booking volume and performance
-

Hotel Coordinator | 02/2015 – 06/2016 | Atlanta

- Supported high-volume partner onboarding and activation within a global SaaS marketplace maintaining service-level performance standards
-

TECHNICAL PORTFOLIO | Integration Scoping & Delivery Documentation | [GitHub](#)

- Documented end-to-end SaaS onboarding workflows, API and SFTP integration processes, and validation checkpoints
- Built structured integration scoping templates defining field requirements, data format specifications, and acceptance criteria for enterprise deployments
- Developed reusable escalation frameworks and deployment guides adopted as team-wide best practices
